

Workshop: Getting Started With Artificial Intelligence and Machine Learning

Peter Krensky

Strategic Planning Assumptions

By 2020, more than 40% of data science tasks will be automated, resulting in increased productivity and broader usage by citizen data scientists.

By 2022, over half of data and analytics services will be performed by machines instead of human beings.

By 2022, 40% of customer-facing employees and government workers will consult daily an AI virtual support agent for decision or process support.

Workshop Agenda

1. AI and ML — Moving Past the Hype and Into Reality : (15 Minutes)
Build, Buy or Outsource and Organizational Principles
2. Group Exercise: (35 Minutes)
Design a Year One Strategy and Pilot Project for the Organization
of One Group Member
3. Report Back: (30 Minutes)
Share Your Decisions
4. Summary and Next Steps (10 Minutes)

Workshop Agenda

1. AI and ML — Moving Past the Hype and Into Reality: (15 Minutes)
Build, Buy or Outsource and Organizational Principles
2. Group Exercise: (35 Minutes)
Design a Year One Strategy and Pilot Project for the Organization
of One Group Member
3. Report Back: (30 Minutes)
Share Your Decisions
4. Summary and Next Steps (10 Minutes)

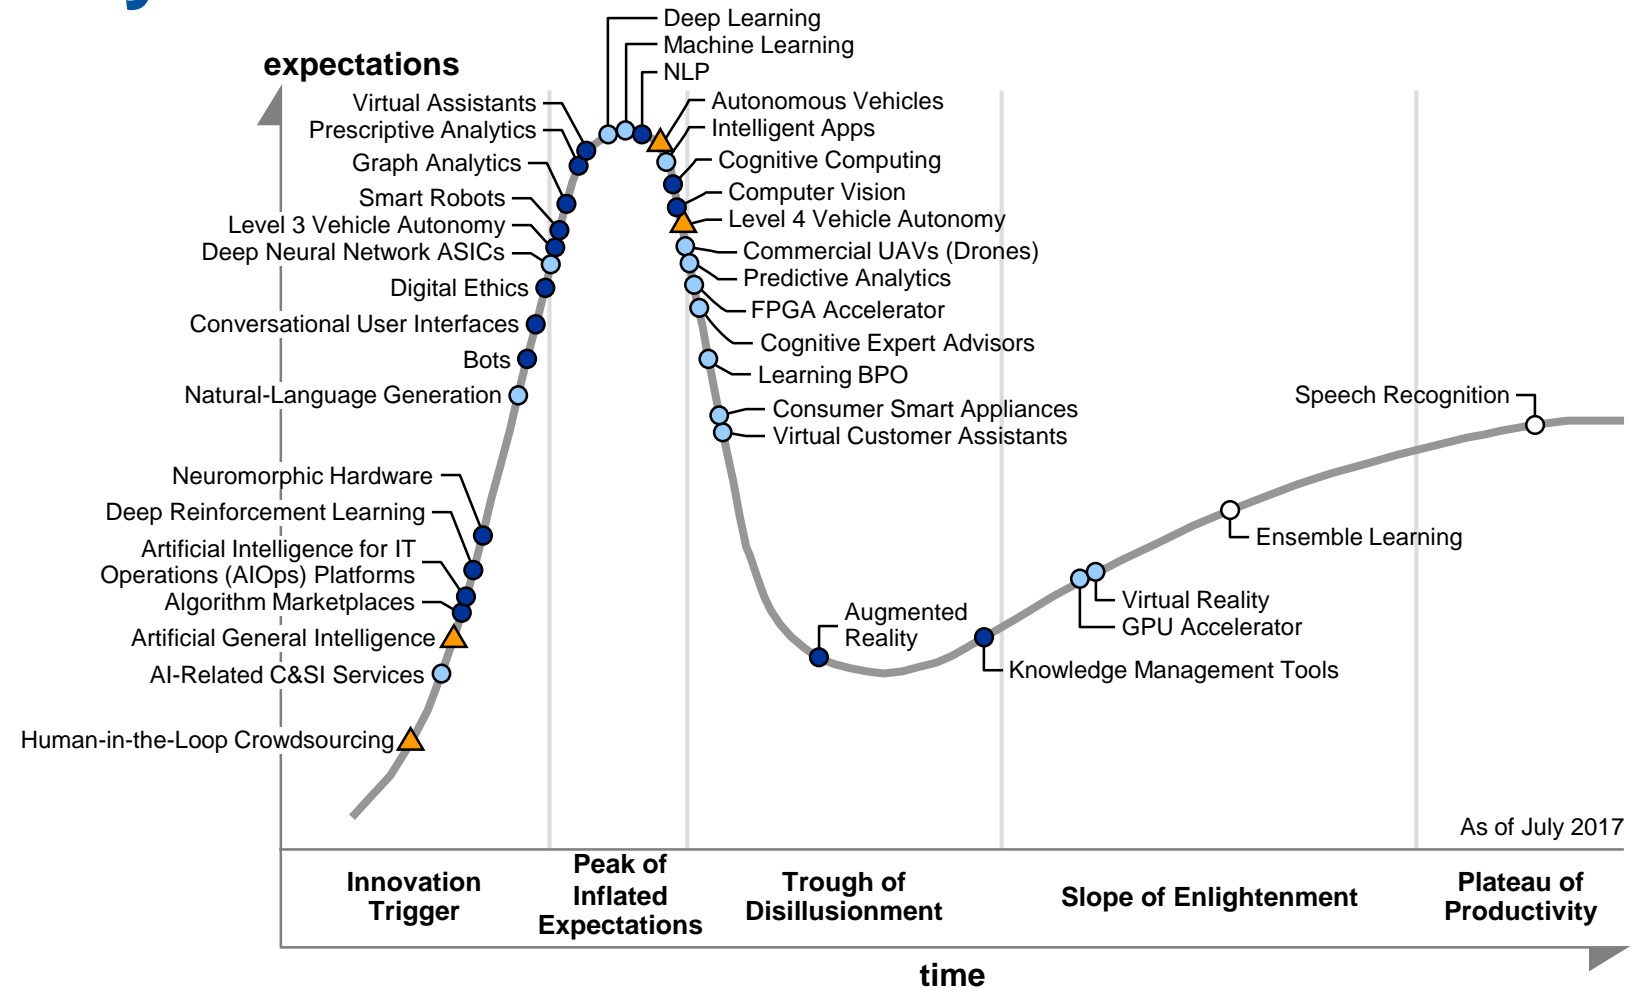

The Gartner AI Hype Cycle

Very early maturity levels

- **86%** of tech profiles (dots) headed to the bottom of Trough of Disillusionment
- **54%** not expected to plateau and deliver reliable productivity for mainstream buyers until 2022 or later

Huge potential

- **41%** offer transformational benefits
- **44%** offer high benefits

The Gartner AI Hype Cycle

Though the lens of D&A

- >50% of hype has nothing do with data and analytics
- Marketers stick the AI moniker on anything remotely algorithmic
- Key data science concepts are crowded around the peak

Hierarchy of Terms From a D&A Perspective

Artificial intelligence can be defined as a general approach to the simulation of cognitive processes by means of computer programs.

Data science and machine learning at its most basic is the practice of using algorithms to parse data, capture knowledge, learn from it, make a deterministic or predictive model and deploy that output into a business decision.

Deep learning is a subset of ML algorithms that creates knowledge from multiple layers of information processing.

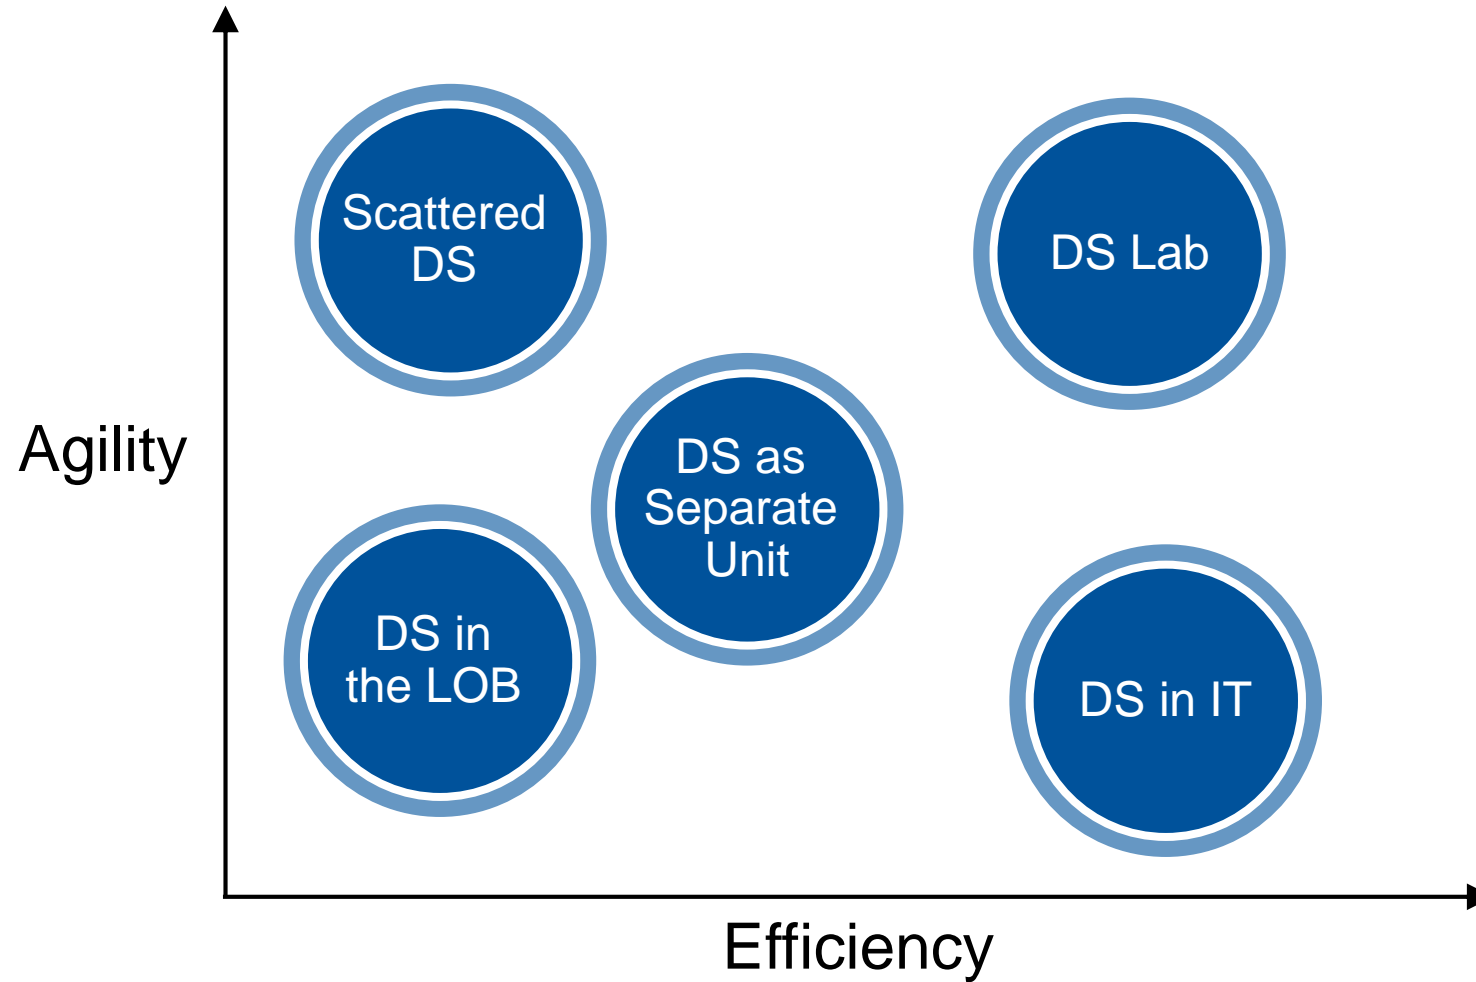

Build, Buy or Outsource?

	A) Generic Data Science Platforms	B) Packaged Analytics Applications	C1) Global IT Service Provider	C2) Global DS Service Provider	C3) Special DS Service Provider	C4) Crowdsourcing Platforms
Ease of Use						
Time to Solution						
Solution Quality						
Cost-Effectiveness						
Learning Experience						
Agility/Granularity of Control						
	BUILD	BUY	OUTSOURCE			

Open Source Is Here to Stay — Technologies Adopted by Data Science Teams

Organizational Principles

Workshop Agenda

1. AI and ML — Moving Past the Hype and Into Reality: (15 Minutes)
Build, Buy or Outsource and Organizational Principles
2. Group Exercise: (35 Minutes)
Design a Year One Strategy and Pilot Project for the Organization
of One Group Member
3. Report Back: (30 Minutes)
Share Your Discussions and Decisions
4. Summary and Next Steps (10 Minutes)

The Group Exercise (35 Minutes)

1. Form into groups of four or five people
2. Group member with earliest birthday in the year introduces organization and current state of analytics
3. Design a year one strategy and pilot project including:
 - All four pillars of data, people, process and technology
 - 6-12 month timeline for pilot project completion
4. Document your rationale and considerations
5. Prepare to present your discussion and conclusions

AI and ML Year One

	Data	People	Process	Technology	Other
Data					
Insight					
Action					
Impact					
Other					

Ground Rules

- Respect the speakers:
 - All ideas/comments are valid.
 - Please stay engaged.
- Speak up and request clarification.
- Make your point first — then explain it.
- Learn something new!
- Have some fun!

Workshop Agenda

1. AI and ML — Moving Past the Hype and Into Reality: (15 Minutes)
Build, Buy or Outsource and Organizational Principles
2. Group Exercise: (35 Minutes)
Design a Year One Strategy and Pilot Project for the Organization
of One Group Member
3. Report Back: (30 Minutes)
Share Your Discussions and Decisions
4. Summary and Next Steps (10 Minutes)

Report Back

- Each team reports back to the whole group on their pilot project and year one strategy:
 - BBO, open source, organizational principles.
 - Considerations, challenges, approach, priorities and rationale.
- Share your "aha" moments; how to apply this learning back to future AI/ML initiatives.

Workshop Agenda

1. AI and ML — Moving Past the Hype and Into Reality: (15 Minutes)
Build, Buy or Outsource and Organizational Principles
2. Group Exercise: (35 Minutes)
Design a Year One Strategy and Pilot Project for the Organization
of One Group Member
3. Report Back: (30 Minutes)
Share Your Discussions and Decisions
4. Summary and Next Steps (10 Minutes)

Summary and Next Steps

1. Thank you for participating!
2. Complete your feedback forms.
3. Keep in touch.
